A message from our CEO

As I look back on the past year, I feel an overwhelming sense of gratitude and pride for what we've all achieved. Our 2024 Impact Statement is more than just a snapshot of progress; it's a story of dedication, resilience, and the deep-rooted passion we all share for nurturing our planet. Together, we're proving that change is possible when we partner together to restore our environment.

Partnership highlights

"We love everything Carbon Positive Australia does and are just so glad to be able to contribute in our own, nerdy way." – Phronesis Security

"We partner with you guys so that we know we are doing things correctly, and that's working with a legitimate organisation and registered Charity. We know that working with you is making a positive impact on our environment." – Nature Boss

"Thanks for the opportunity to again participate in Carbon Positive planting projects. It is always a memorable experience working with you all to do something positive for the environment and community. It gives me great pleasure to help in the restoration of degraded areas of land and to be involved in bringing back healthy biodiversity to the bush." – Ros MacFarlane, Sandalwood Solutions

Upcoming plans

Nature positive planting: restoring Australia

- Planting to provide habitat and food sources for native species at [Manypeaks, WA.](#)
- Adding density and biodiversity to the transitional soil restoration at [Eurardy Reserve, WA.](#)
- Planting to restore salt-affected land in WA's Wheatbelt at [Brookton, WA.](#)

Team at Eurardy Reserve planting site

Community pocket forests: addressing urban heat

- Enhancing environmental knowledge within the community with The Groundswell Collective, NSW.
- Conducting research through school plantings with the Harry Butler Institute & Murdoch University, WA.
- Activating community action with The Climate Factory, ACT.

Planting the Queanbeyan pocket forest

Funding community plantings: catalysing local action

- Reforesting degraded land in regional Queensland with Brettacorp Inc.
- Connecting people, music and Country with Activate Tree Planting, WA.
- Revegetating degraded farmland in regional Victoria with Regen The Plains.

Poseidon Primary School, a year post-planting

THANK YOU!
